

Ethics and Art

Two Ways of Liberating the
Energy for Transformative Action.
A personal spiritual journey

Christoph Stückelberger

Founder President Globethics.net,
Assist. Teacher of Ethics, Assistant Artist

Ethics and Art: 2 expressions, 1 goal

Ethics: Orientation, what is good and bad, right and wrong.

Art: Transforming the perception of the visible, making the invisible visible.

For me, ethics and art are **two expressions of one goal**:
“How to liberate energy for transformative action?”

Art & Ethics = Contemplation & Action

Not by “you shall”, but “you can”

Not by showing disasters, but longing for the future.

End of first book, 1979: “Congratulations” (you can)

End of 2nd last book Globalance, 2020: “I have a dream”

SDG: Sustainable Development Goals? Yes, but here:

SDG Soli Deo Gloria, All Glory to God alone

Reformer John Calvin, Geneva, signed all his books at the end with 'SDG'. Similar: "I want to be a puddle of water and mirror the sky." (Helder Camara)

"Prof. Dr Dr h.c. mult."? Better:

Assistant Teacher of Ethics: God is the true teacher of Wisdom.
Assistant Artist: God as creator is the true artist,
I just modestly want to admire and express thankfulness.
Simple question I want to ask in every activity: is it in line with the will of the giver of life? Does it express my thankfulness?

Invisible Visible

The source of my energy/
ethics: The invisible visible,

God father/mother:

She is Creator (tree)

God Jesus Christ:

He is Liberator (empty cross)

God Holy Spirit:

She is Innovator (dove)

God one in three (Trinity)

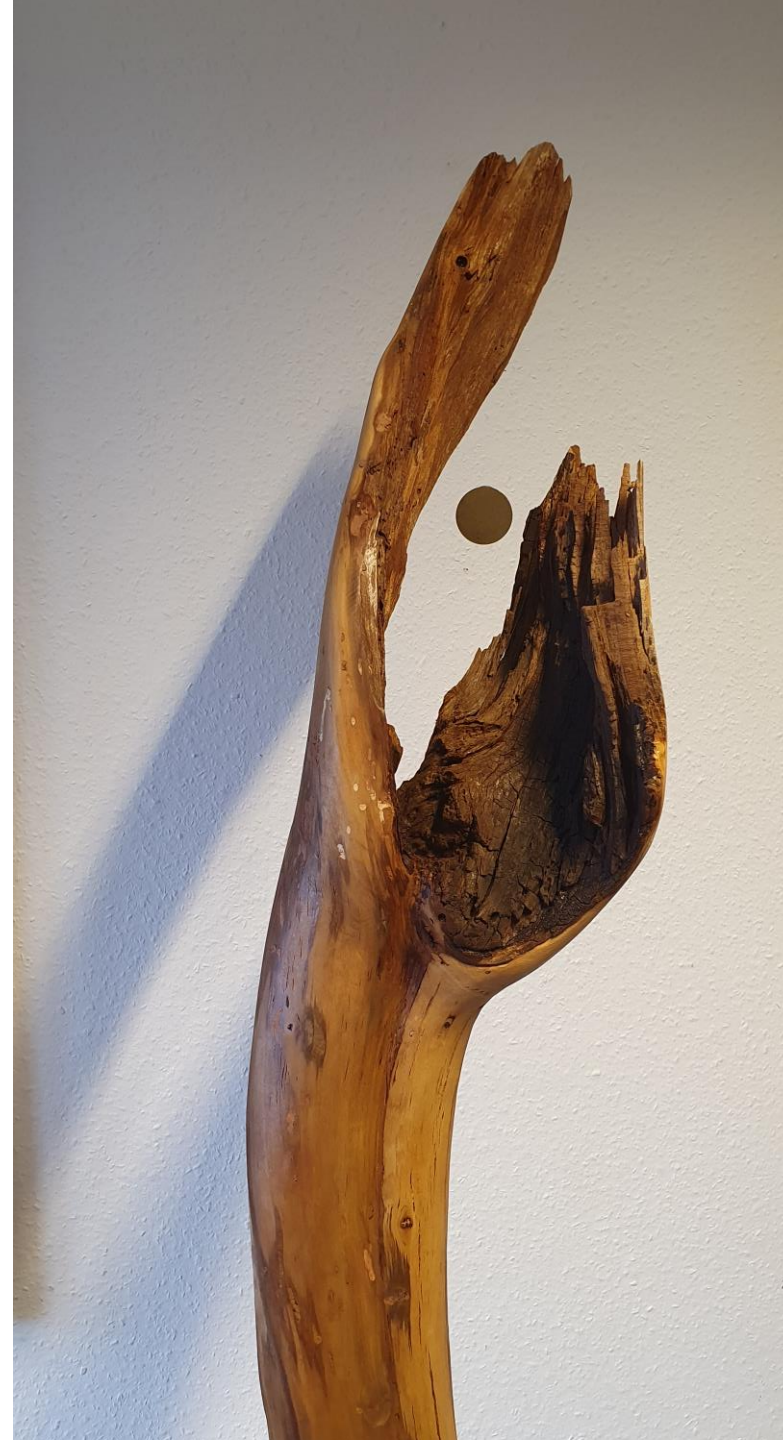

Longing

If you want to build a ship, teach the longing for the endless sea.”
(St. Exupéry)

If you want to change behavior by ethics, awaken the longing for the better world (Prophets’ and Jesus’ vision of the Kingdom of God).

Sculpture: Longing for the Moon
(Do it with your arms and breathing in/out)

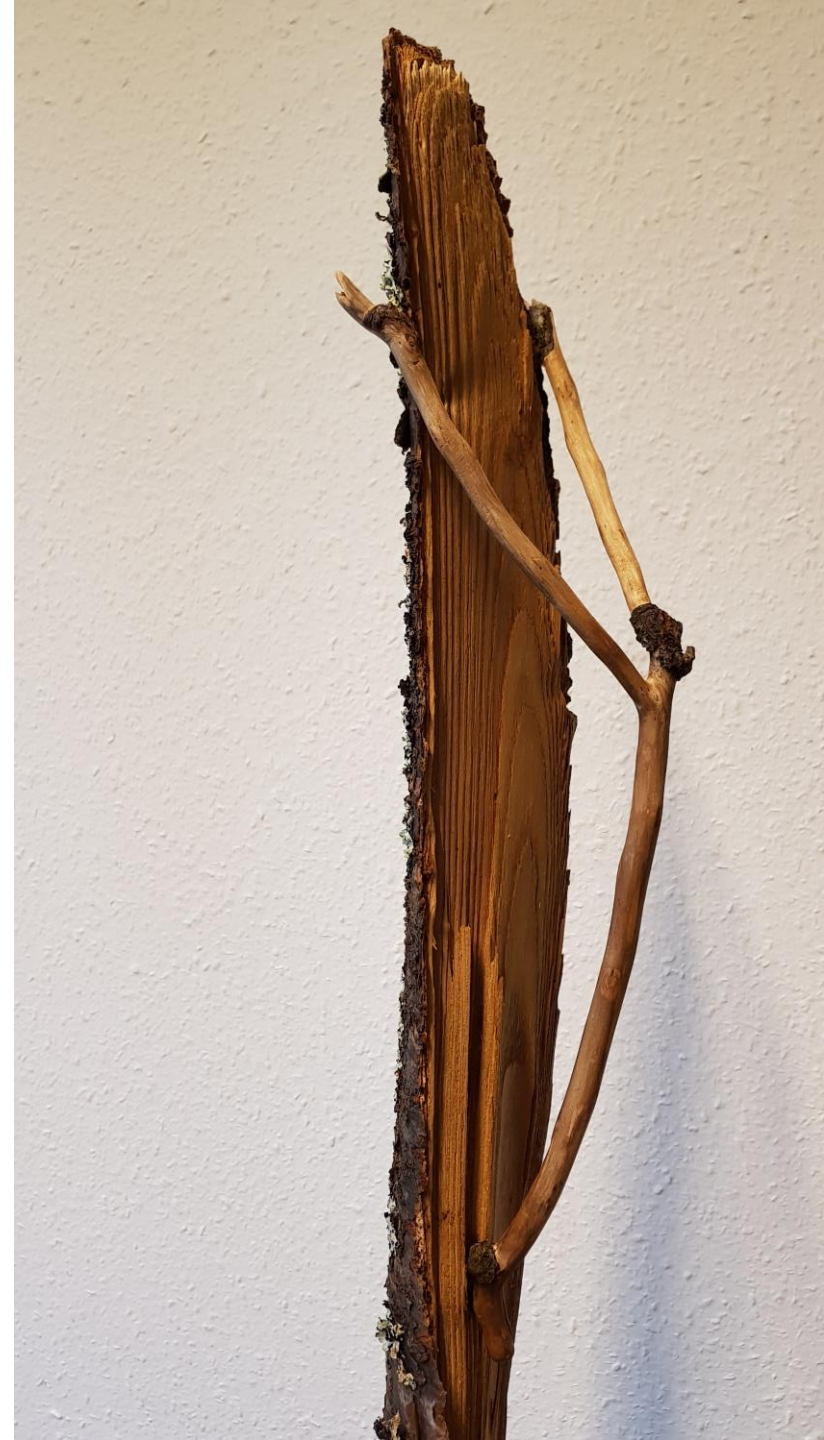

Compassion

“You shall reduce Co2 emissions”
is not enough energy to act.

Empathy and compassion leads
me to suffer with trees, fishes,
animals, wind as I am part of the
whole creation: it liberates energy.

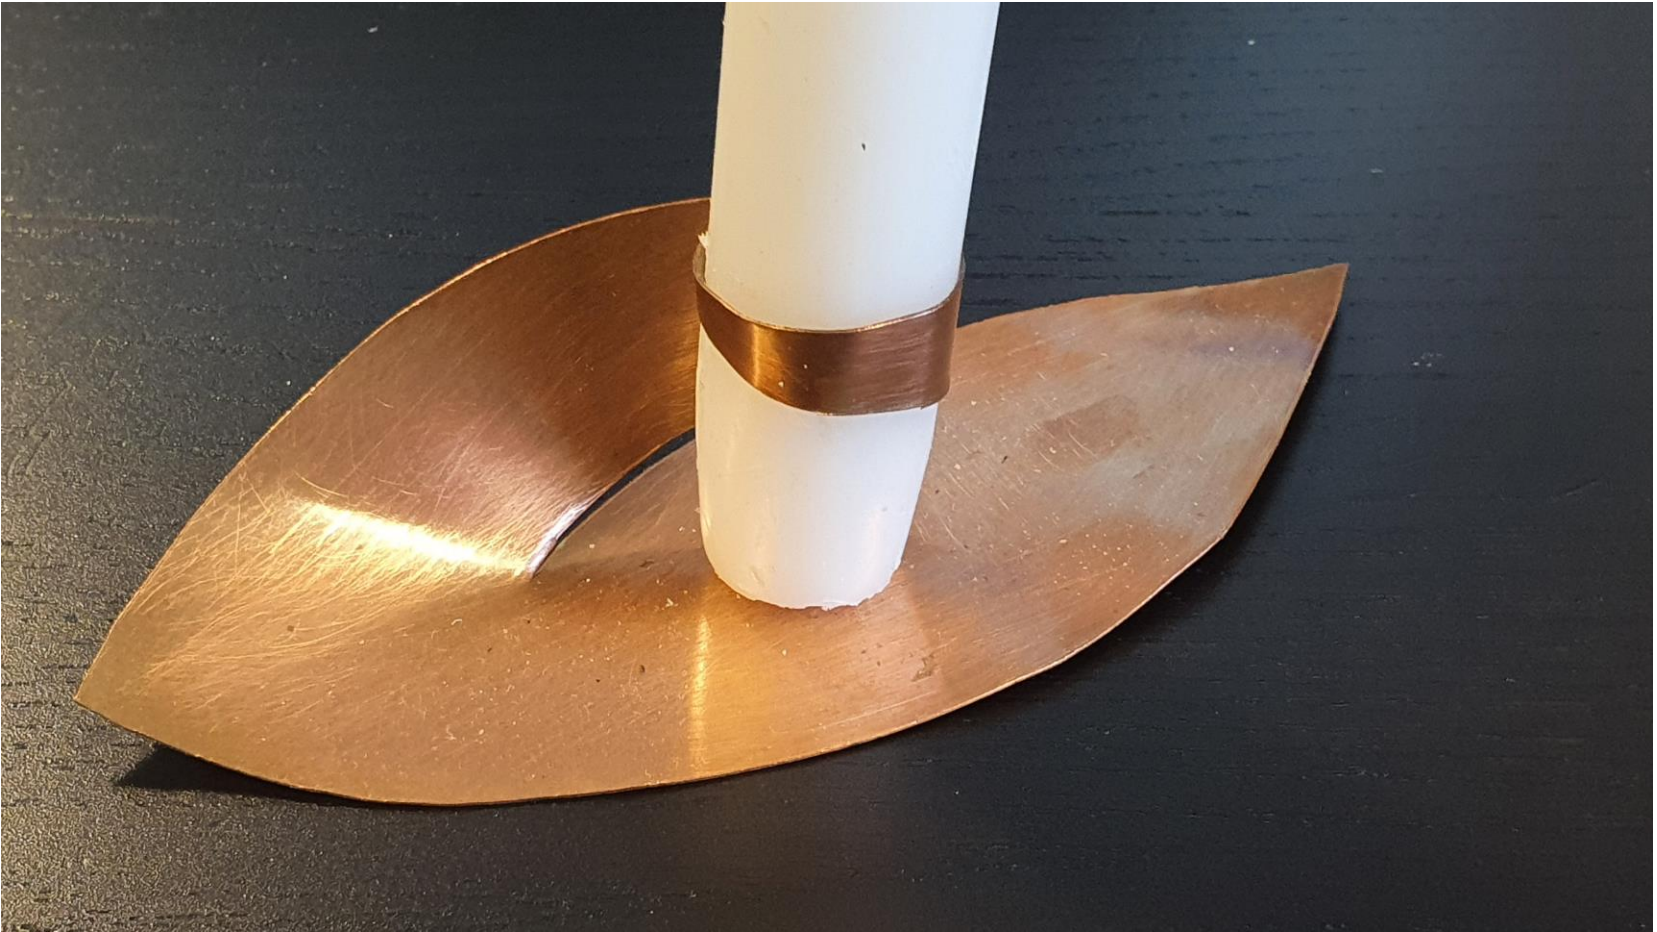

Sculpture: Crucified Creation

The Beauty of Simplicity

Simplicity is the Perfection of Complexity (CS)

A candle holder from one leave and one cut (copper)

The Beauty of Age

“The face of an old person is beautiful, with dignity”

“I want to support elderly people in their dignity.”

Further Deepening
